Chapter 1

Overview: FPORDERS

FPORDERS is a new application. It will be used to order Forms, Publications, Letters, Burial Flags, Pharmaceutical Products and other items stocked at the Service Distribution Center (SDC). It replaces the FALCON On-line Data Entry System and ISMS (Integrated Supply Management System) for the ordering processes.

FPORDERS is accessed from the main VACCESS Timesharing menu at Austin. Instructions for obtaining the required access and logging onto FPORDERS are included in Chapters 2 and 3.

FPORDERS provides enhanced ordering and information capabilities.

1. It provides the capability to establish a single REPETITIVE ORDER that can be reused simply by completing the quantity to be ordered. See Chapter 5, Sections B and C.
2. When using FPORDERS to submit an order, the inventory/quantity on hand is checked to determine if the requested quantity is available. If there is not adequate inventory on hand, an option to backorder (Y or N) the item will be provided. Adjustments made by SDC personnel during the day may change the status of an order during nightly batch processing.
3. Special selections must be made from the Main Menu for accountable or emergency orders. The REPETITIVE ORDER cannot be utilized for these orders. See Chapter 9, Definitions, for explanation of order categories.
4. FPORDERS provides the ability to view items by VA assigned stock number (Fxxxxx, Pxxxxx, Lxxxxx,). Option S (VIEW BY STOCK NUMBER) from the Main Menu will take you to a list of stocked items in stock number sequence. You may position the listing at a given point by keying in the entire stock number or the first letter, then move forward and back within the list using the PF8/PF7 keys. This listing provides the ACTUAL FORM NUMBER OR NSN, abbreviated title, unit of issue, stock on hand and an indicator annotating accountable stock.
5. FPORDERS provides the ability to view/search on items by the actual form number or National Stock Number (NSN). Option F provides a list of stocked items in actual form number or NSN sequence. This listing provides the VA assigned stock number, abbreviated title, unit of issue, stock on hand and an indicator annotating accountable stock.

6. Once an order is placed, using the PF5 (ORDER) or PF6 (UPD/ORD, in a REPETITIVE ORDER), it is stored on a file to be processed during the next LOG processing cycle. You can view orders on this file by selecting Option T, and entering the station number. This will give a list of all transactions waiting to be processed for that station. The list includes the user id of the person who submitted the orders and the time and date. Once an order has been processed, the transactions will be removed from the list.

It is highly recommended that you review this entire FPORDERS User Guide, including Chapters 8 and 9 for hints and definitions prior to using FPORDERS.

Chapter 2

Obtaining an Austin USER ID

1. In order to access FPORDERS, you need ACRS Functional Task Code (FT) 190AA07.
2. If you have access to ISMS, then you already have the required access. You are already in the internal security tables. Use your ISMS user id and top secret password to access FPORDERS.
3. If you have access to FALCON or some other Austin S/ 390 Server application (other than ISMS), you may or may not have the required access and will need to contact your local ACRS Point of Contact to determine if you have FT 190AA07. If you do not have that FT, please complete form 9957 to request FT 190AA07. Give this form to the ACRS Point of Contact at your local facility. Follow instructions in (5) below to provide your user id for updating the FPORDERS internal security tables. You will use your existing user id and top secret password to access FPORDERS once your user id is added to the security tables.
4. If you have no access to the Austin S/390 Server, complete form 9957 and give it to your ACRS Point of Contact. They will request the access and functional task through ACRS. They will provide you with your user id and top secret password once the request is processed.
5. All customers who have FT 190AA07 have been included in the FPORDERS internal security tables. This includes VBA customers, ISMS customers and some VHA customers. If you did not have FT 190AA07 on March 1, 1999, you need to provide your existing or new user id for the internal security tables. Send an Outlook mail message to FPORDERS. Please be sure to include your user id in the mail message. The user id will be added to the FPORDERS internal security tables and a return message acknowledgment will be mailed to you. Once you receive the acknowledgment, you will have access to FPORDERS.

> PF6 (UPD/ORD) will cause the order to be submitted, and the REPETITIVE ORDER to be created or updated.

NOTE: Whenever you use the PF4 or PF6, if you have an existing REPETITIVE ORDER, it will be replaced with the information in the current order being entered, however items without a quantity desired on the order are not deleted from the REPETITIVE ORDER format.

Helpful Hints

Pharmaceutical orders are placed using the Accountable Order Option to ensure adequate lot control may be maintained. These orders will be handled as emergency orders and shipped via priority methods to arrive at the facility the next business day if the order is submitted prior to 02:00PM Central Standard Time. If Saturday delivery is required call the SDC at 708 786-7760 for assistance. Use option **F** to cross reference the NSN to Depot Stock No.

Press the **tab** key to **move between fields**.

Leading zeroes of numeric fields do not have to be typed in. Fields defined as numeric are the numeric portion of stock number, requisition, and quantity.

Validation checks each stock number entered against the official file, line by line. If the stock number is not on the official file, the message 'INVALID STOCK NUMBER' will be displayed on the lower left of the screen. Correct by typing over the displayed stock number.

If there is not enough stock on hand to fill the order the message "NOT ENOUGH STOCK TO FILL THIS ORDER. TYPE Y TO BACK ORDER N TO CANCEL ORDER" will be displayed at the bottom of the screen. Type Y or N at the Right of the line, where the cursor will be blinking under the "B". .

Adjustments made by SDC personnel during the day may change the backorder status of an item during nightly batch processing.

No other validation is made until the **LOG1 programs edit the orders each night**. The daily 122 and 123 report will list any rejected items or changes in quantity that may be required.

If you press <enter>, the information will be validated and the ACTUAL FORM NUMBER OR NSN and abbreviated title will be inserted for your review.

If you press PF4, PF5, PF6, PF7 or PF8 the information will be validated and the ACTUAL FORM NUMBER OR NSN and abbreviated title will be inserted.

If no errors are found, the program will perform the selected function and return you to the main menu.

To order more than 17 items, press PF8 to scroll to a new screen. The screen will appear with your station number, your requisition number and your reference number already filled in. Don't panic, your previous line items are not lost. You can now add additional items (max 195) to your order by filling in the required information and pressing PF8 for another screen. The entire order can now be reviewed by pressing PF7 to scroll back and PF8 to scroll forward.

To delete items, put spaces in the **STOCK NO** field .

PF Keys must be mapped locally, and each local communications software determines the method of key mapping. Please contact your local IRM for assistance.
